

ADVANTAGES OF USING RAISED ACCESS FLOORING

Superior learning environment through incorporation of modern design principles and great acoustics.

Easily accommodates technological changes of the future, which change as per student's needs.

Reduced facility maintenance costs through accessible & flexible services.

Easily adapts to organizational changes, collaborative learning environment over the building's life cycle.

Layout modifications possible with minimal disruption to academic activities and schedules.

Enduring learning structures that stand the test of time and change.

Education is in a state of constant change today and the classrooms of the day thrive on collaboration & teamwork. The shift towards active and task-based learning, facilitated by technology, combined with a need to support the different learning styles of different individuals, means that educational environments must be increasingly varied, flexible and adaptable in order to provide a learning experience that is tailored to the needs of today's students.

These educational spaces must be built to last, to be ready for a future that we can only ever partially predict. Unitile raised access flooring technology lets you address the points essential to deliver and enhance the quality of your educational spaces.

APPLICATIONS

CLASSROOMS

SHAPING YOUR LEARNING SPACES.

With the advent of modern teaching techniques which support group & individual learning methodologies, it has become vital for **classrooms** to be modular in nature so that the layout can be changed to best adapt to learning style while ensuring they have accessible point-of-use services. Modular nature of Unitile raised flooring technology allows you to configure your classrooms according to your functional requirements (fluctuating classroom size, learning methods).

AUDITORIUMS

STEP UP THE QUALITY OF YOUR LEARNING ENVIRONMENT.

Auditoriums of the day have to come armed to accommodate a large capacity of students while ensuring the superior acoustics. Unitile raised access floors are vital in ensuring curvature of the auditorium structures while imparting flexibility and adaptability to the structure. Unitile's stepped raised flooring comes to aid for auditoriums with the better access to electrical & fire services and increased seating capacity.

LIBRARIES

DISTRACTION-FREE POWERHOUSES OF KNOWLEDGE.

Libraries are mandated as the powerhouses of academic institutions which have to house the new and old ways of learning- from books, journals to e-library services. They have to be noise neutral to ensure that the sanctity of the library is maintained and it's a distraction-free space. With Unifold world's first raised and advanced flooring technology, it is possible to ensure this noise- neutrality in the libraries at a first cost advantage.

TRAINING ROOMS

MAKE EVERYTHING TECHNOLOGY-FRIENDLY.

Training rooms are dynamic areas where people meet, learn, share ideas and collaborate. They have to incorporate learning technologies to ensure that learning needs are met adequately. With Unitile raised access floors, easy access to underlying UFSD services translates into easy maintenance and ability to make changes when need arises with minimal disruptions and in-house personnel.
